## The Time Machine

You feel yourself waking slowly. Eyes half open, you stretch your arms, your legs. It feels good. Something so simple as stretching and it feels so good. You open your eyes all the way and see the light streaming through the window. The morning is calling you. You slip your feet over the side of the bed, stretch your arms once more for that good feeling, and then spring to your feet. So many things before you: perhaps a jog through the park; a long walk down by the river; or maybe down to the courts for some tennis, and then a good swim afterwards. Perhaps all of it. For the day is yours to move through . . .

Can you remember mornings like that? The eagerness, the anticipation? The body moving fluidly, effortlessly, painlessly? When you could take on a day that had no limits? Or at least it felt that way?

For most of us in our forties and fifties, that kind of easy-moving body is no longer with us. And some of that lively, eager attitude has probably faded a bit as well.

And yet . . . how good it would be to have those days back, that vigorous young body back, that alacrity of spirit back. To hop into an H. G. Wells kind of time machine and get it all back.

Alas, those days are gone, faded into the mists of time, and we will never bring them back.

**There is no time machine. Or is there?**

In reality, although we have not the means to travel back in time, we do have the means of bringing our younger, stronger bodies back, back to us here and now in the present. Back from how they were ten, fifteen, twenty years ago. So we do, in a sense, have a time machine. And that time machine is called somatotropin, or Human Growth Hormone. **HGH.**

## The Modern Miracle

**Suppose someone were to tell you there was a simple way to:**

- Increase muscle mass and lose fat, without dieting or exercising
- Increase bone mass and reverse the process leading to osteoporosis
- Increase the thickness and elasticity of the skin, and improve skin tone
- Improve cardiac function
- Improve kidney function
- Strengthen the immune system
- Recharge sexual desire and performance
- Speed the healing of wounds
- Lower blood pressure and cholesterol levels
- Promote regeneration of aged and weakened organs such as kidneys, liver, and heart
- Diminish or eliminate wrinkles
- Improve cartilage formation in joints
- Replenish youthful energy levels, improve aerobic capacity
- Regain youthful exuberance and improved outlook

- Achieve better and more restful sleep
- Diminish or eliminate cellulite
- Regrow hair (in some cases) or reduce the gray

You would say this was a miracle. You would say that no single substance could do all that. That it was impossible.

And you'd be wrong!

Human Growth Hormone – HGH – has been shown to do all of that. HGH is the modern miracle. It is here now, and it works. The data of the past few decades, particularly the last decade, confirms the amazing, anti-aging effects of HGH. And the data continues to amass, further corroborating the previous studies.

SomaLife managed to create a patented product in 1998 that acts as a precursor to encourage your pituitary to release more of your own growth hormone, safely and naturally. Youth Formula offers you **The Time Machine** in just 6 capsules a day, to allow you to live young as old as possible.

*Shipping and taxes apply where applicable.*

### *Here is what some of her readers have to say . . .*

This was a book I couldn't put down. I was not expecting to read the story I read. I have known Marlies through her **Youth Formula** success (amazing product BTW) but not really "known" her. But in **Because He Could** she let me see so many sides of her. She was willing to bare it all in this book and what a story! What a woman of resilience! I have such a profound new respect and appreciation for this woman who overcame so much. She fought for her marriage and fought for her business. A beautiful but hard story, yet told with such grace and love even through her darkest of days. Thank you, Marlies for being a strong example to ANYONE going through difficult life circumstances. I wish you much joy and happiness in your life. You deserve it!

I am very serious about this. I could not put this book down. Marlies wrote about her life and she wrote it in a way that makes you not want to go to sleep until you find out what happens next! The book was written as well as the best writers out there! Congrats Marlies! It was so good you should seriously think about writing fiction! I will be letting everyone know! On another note: I take your youth products and someone actually told me last summer that my skin was awesome. I would like to think it was because of your Youth vitamins!

I really enjoyed this book because it was written from the heart with truth, honesty & bravery. I also use **Youth Formula** personally and it is helping strengthen my immune system and helping me feel the best that I can. I recommend both the book and taking **Youth Formula** for your anti-aging health.

### QUOTE OF THE MONTH

*"Many of life's failures are people who did not realize how close they were to success when they gave up."*

— Thomas A. Edison
